

Treasury Bank Reconciliation SOP

*Document TR-SOP-441 · Retail R2R close · First National operating account ****4481*

1. Match rule

Match bank statement lines to general-ledger cash postings on **Amount** and **Reference Number**. Posting date may differ from statement date by up to **two business days** (temporal window). Single-currency USD only.

Customer remittances may land as one bank deposit covering several AR documents. Use allocation (M:N) matching and emit unapplied cash on the residuals port.

2. Running balance

Computed collected balance = previous stated balance + deposits – withdrawals, row by row in statement order. Flag any row where computed balance differs from the bank's stated running balance.

3. Stale items

Uncleared checks and deposits in transit older than **30 calendar days** are high risk. Cite this SOP in the decision explanation. Outstanding April checks CHK-440112 (USD 8,750.00) and CHK-440188 (USD 4,120.55) are in-scope examples for the May close.

4. Output

Certified PDF audit report with match-status summary and a controller sign-off block. Live chat or ticket dispatch is not part of this SOP.
